

In today's environment the problems we experience with the sustainability and restoration of water resources has created a major challenge in the ability to replenish and return this vital liquid for use by increasing populations and industries.

HYDROMAX SERVICES specializes in the rejuvenation of depleted water resulting from; Industrial discharge, chemical wastes generated by agriculture production including herbicides, pesticides, fungicides and fertilizers. We also revive aquatic life in rivers, lakes and streams.

HYDROMAX SERVICES developed the "**Bio-Optimizer Unit™**" for exclusive use by "Kanutam" in the restoration and treatment of production water.

Benefits of the "Bio Optimizer Unit™" from HYDROMAX SERVICES

- ➔ Increased Dissolved Oxygen levels, (5 ppm or better).
- ➔ Maintain DO at 5 ppm or better.
- ➔ Stress reduction in aquatic life due to oxygen depletion.
- ➔ Better use of nourishment.
- ➔ Reduced mortality of aquatic life.
- ➔ Increased aquatic life through better health and growing ratio.
- ➔ Density of aquatic life is increased in the same area.

Other Applications

- ➔ Wastewater treatment plant.
- ➔ Restoration of rivers, lakes, streams and stagnant ponds.
- ➔ A great many uses in Industrial, Petroleum and Food processing.
- ➔ Reduction of Biological Oxygen Demand (B.O.D.)
